Shipping Liner Assembly Instructions

Hand inside the bag

Corner folded under bag bottom

1 Insert your hand to one of the bottom right corners of the bag then pull the corner out and fold it under the bottom of the bag.

2 With your right hand still inside, grab the other corner with your left hand and fold the second corner under the bag to form a square bottom.

3 Insert the shipping liner in your Kold-To-Go corrugated Box.

4 Push the air out, then close-tape gradually from side to side. Fold the Corners onto the liner and close the box.
