

Date: April 19, 2022

Dear Valued Customer,

We thank you for your continued trust and for using our Sapphire™ infusion system.

Eitan Medical offers a broad portfolio of administration sets for use with the Sapphire™ infusion system to support delivery of a wide range of therapies. As part of our continuous effort to ensure supply redundancies, portfolio diversification and steady product developments to respond to growing market demands, we are excited to announce that we are adding PALL® filters to our portfolio from April 2022.

The administration sets AP 204-01 (12003-000-0070) and AP 206-01 (12000-000-0022) have now incorporated PALL® filters. The indications for use for both Sapphire administration sets are not affected.

The existing P/Ns will be preserved.

Product transition details:

Item Name	Product Number		Previous set with GVS® filter	New set with PALL® filter
				
AP 204-01	12003-000-0070	Box GTIN	27290109159267	27290109154613
		Blister GTIN	17290109153107	17290109154616
AP 206-01	12000-000-0022	Box GTIN	27290109159281	27290109154620
		Blister GTIN	17290109153114	17290109154623

To support this change, a technical bulletin is provided with this communication.

The top priority of our teams is to support you during the migration process. Please reach out to our highly responsive support team with any questions or concerns during this transition and beyond: 877-541-9944 or customerservice@eitanmedical.com.

Sincerely,

Roger Massengale
