Quick Change of Disposable
Same Infusion Volume, Same Programming

1. Connect the CADD™ administration set to the bag. Without removing the blue clip on the cassette, prime the tubing manually until all air is removed. Or follow instructions below to prime using the pump.

Power Button

2. Turn on the pump.

3. Remove the blue clip and attach the new disposable to the pump.

4. The pump displays the question Reset reservoir volume to XX mL? Select YES to confirm.

5. The screen displays Prime tubing? Select YES to prime using the pump. Select No if tubing was pre-primed.

6. Enter the 3-digit security code. Press ▼ or ▲ + select if needed.

7. Start the pump.
