

Prep-Lock™

Tamper Evident Additive Port Cap

For B. Braun PAB® & E3® IV Bags

The Prep-Lock™ Tamper Evident Additive Port Cap provides remarkable protection and protocol assurance to the medication port of select Baxter IV Bags. They provide visual evidence that medication has been added, tamper-evident protection and more. The simple one-handed installation and considerable contributions to the integrity of IV compounds have made these caps a favorite of pharmacists everywhere.

Diversion Prevention, Protocol Assurance & More

- Strengthens USP <797> Compliance.
- Provides protocol assurance with visual indication medication has been added.
- Protects against tampering or misuse.
- Simple one-handed installation is a superior solution over sticky foil seals.
- Advanced design guarantees once the cap is applied it cannot be removed without damage to the IV Bag.
- Reduces risk of contamination.
- Helps ensure product integrity.
- Helps reduce waste and shortages, by providing confidence that unadministered bags can be returned to the pharmacy.
