

Prep-Lock™

Tamper Evident Caps

For Luer Lock IV Syringes

Prep-Lock™ Tamper Evident Caps safeguard the integrity of your medications, by providing a secure, sterile, tamper-evident closure to IV Syringes. Prep-Lock™ Caps enhance medication safety, reduce waste and associated cost, and serve as an active deterrent to diversion. Tampering is immediately evident when the outer sleeve is broken or missing. They are the perfect complement to your overall drug security program.

Improve <797> Compliance

Ensure the integrity of your compounds with USP recommended security.

Maintain Sterility

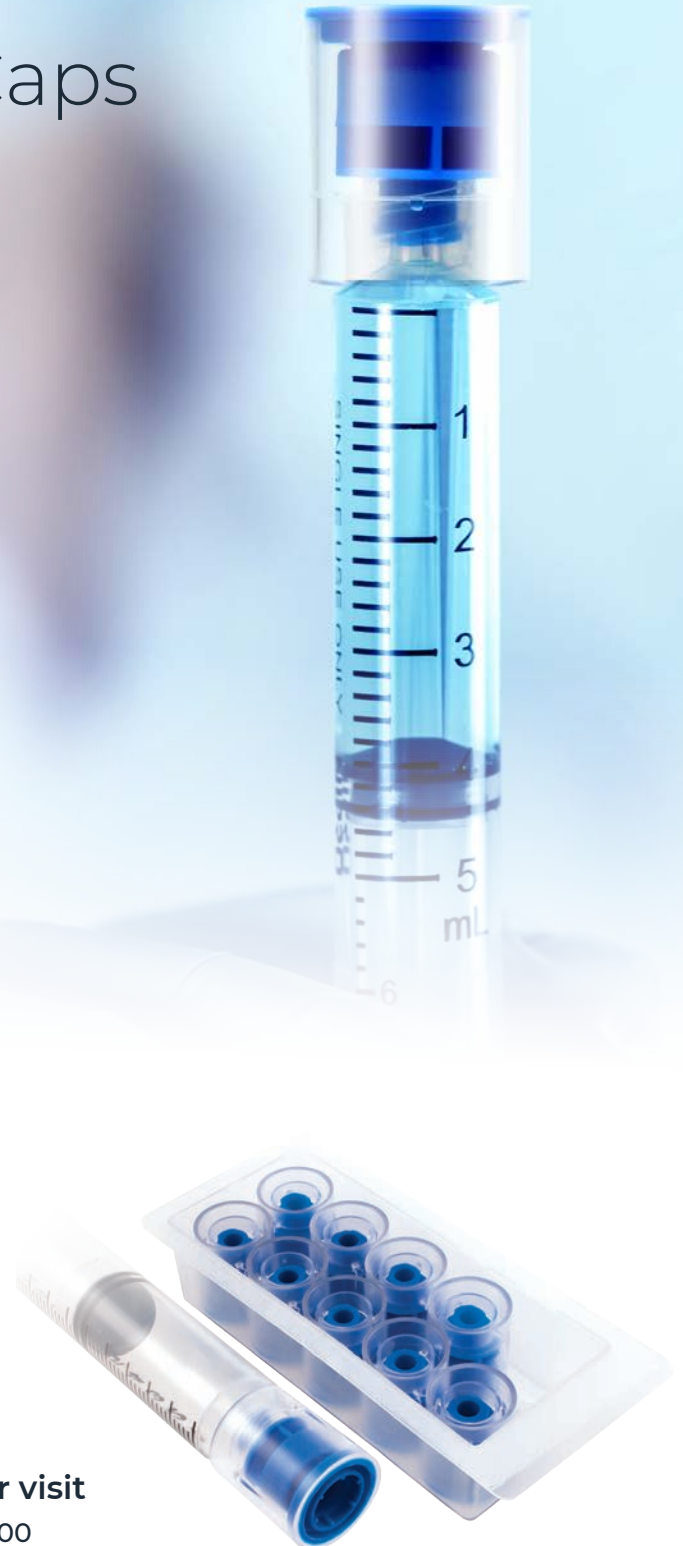

Evidence of access indicates the potential compromise of content's sterility.

Help Reduce Drug Shortages

Syringes with intact Caps may be returned to the Pharmacy.

Active Diversion Deterrent

Provides a physical barrier to the opportunity for misuse.
