

IMed Products® IV Start Kits streamline clinical workflows by consolidating essential supplies like antiseptic preps, gauze, dressings, tape, and tourniquets into one convenient, ready-to-use package. By providing these components in precise quantities, each kit reduces waste and simplifies preparation to ensure providers have reliable tools for consistent patient care at the point of care.

## FEATURES & BENEFITS

- Combines essential IV start components into a single package, reducing supply gathering time and improving procedural efficiency
- A range of kit options allows facilities to select setups that align with clinical preferences and protocol requirements
- Helps promote uniform practices, improving consistency and simplifying staff training
- Consolidates multiple SKUs into one kit, helping streamline purchasing, stocking, and replenishment processes
- Organized packaging enables quick access to components at the point of care, supporting faster patient turnaround
