# Patient Belonging, Lab Specimen and Zip Bags

Medegen Medical Products is your BEST source for cost saving, innovative patient care, medical specimen, and healthcare packaging needs.

- **Patient Belonging Bags** – Check out our Industry leading line of patient belonging and setup bags, including the economical TIE&GO® Bag!
- **Lab Specimen Bags** – Now with industry leading Lab Guard® and Tear Zone® brands Medegen offers the broadest range of easy-to-use, secure specimen transport packaging.
- **Zip Bags** – Because not everything is healthcare or the lab has a custom package, Medegen offers a broad range of zip bag sizes with thick, secure white zippers for easy isolation and protective packaging.

Our field Sales Consultants understand the unique demands of health care providers and can help in selecting the appropriate products for intended applications, all with the goal to help you optimize your resources and operations efficiencies.

# Patient Belonging & Setup Bags

Patient Belongings Bags are a convenient and cost effective means to collect, transport and store patient belongings from the time of admission, transfer to room, between departments and ultimate discharge. Bags come in a variety of sizes, styles and strengths to handle most personal belongings.

- Choice of closures include: Drawstring, Draw Tape, Rigid Handle with snap lock feature, TIE&GO handle, Zip Closure and Adhesive Tabs
- Durable polyethylene construction with built in gusset expands capacity, is tear resistant and provides a stable platform for adding/removing clothing
- Colored film for personal privacy/security or clear for loss prevention
- Standard labeling facilitates an easy to recognize write-on space for client name and room number. Also available without print
- Ideal solution to help organize and manage patient belongings or set-up materials during stay
- Set-up bags identify specific use applications and client specific ease of control
- **Customized Printing** provides immediate identification and public relations/brand awareness for your facility (name, logo, address, etc.) or specific department (ER, Same Day Surgery, Maternity, etc.). *Minimum order quantity required*
- Typical areas of use: Admissions, ER, Outpatient Clinics, Labor and Delivery, Discharge and wherever client clothing/personal effects are collected

# Lab Specimen Transport Bags

Laboratory Specimen Transport Bags facilitate collection, storage, identification, and transport of laboratory specimens and cultures within the hospital or surgery center, as well as to off-site facilities and laboratories. Bags contain a dual pouch system which separates and protects samples from the accompanying paperwork.

- **Lab Guard® Branding**, the specimen packaging trusted by hospitals and labs for over 25 years
- **TearZone® EZ-Open Feature** makes specimen bags faster to open than the zipper when a specimen is in processing
- **Expanded Temperature / Stat Selector Check Boxes** for even greater versatility when using Medegen's Lab Guard specimen bags
- Available in a variety of standard sizes in clear or colored film with easy to use zip closure, reclosable adhesive, or permanent tamper evident adhesive closure systems
- Typical areas of use: Phlebotomy Labs, Chemistry & Hematology, Pathology, Toxicology, Microbiology, Emergency Room, Treatment Areas, Drug Screening, or wherever Routine Clinical Laboratory Specimen Collections are drawn
- **FDA Registered!**

# Specialty Bags

## UV Protection Zip Bags (Amber Color)

Take comfort in knowing the integrity of critical light sensitive products won't be compromised during testing, shipping and storage. Contents can be viewed through the film. Film contains UV blockers to prevent bag contents from harmful light impact. Premium thick, white zipper opens quickly and easily. Complies with USP procedure 66-1 with light transmission not exceeding 10% at any wavelength. No Print.

## UV Protection Adhesive Closure Bag (White/Gray Opaque)

Speci-Gard® style Press and Close® Adhesive Closure Bag features opaque gray white film that prevents light from entering the bag, protecting light sensitive contents. Access to contents is available with EZ-Tear Perforation. See page 11, item SPECI-UV.

## Anti-Static Zip Bags (Pink Tint Color)

- Bags qualify as Type 2 under MIL-B-81705D entitled barrier material flexible and electrostatic free
- Bags are tested to dissipate an induced 5000 volt charge to technical zero in accordance with FTS 101C, method 4046.1
- Smaller sizes packaged in DispenserBag® convenience packaging
- Pink color film indicates anti-static properties; thick, durable white zip closure. No Print.

# Medical Equipment and Cart Dust Covers

Equipment Dust Covers are designed for non sterile protection of medical equipment, linen, and supplies during transport or while not in use. Joint Commission recommends the use of protective covers for shielding clean linen from dirt and contaminants.

- Effective dust and dirt barrier helps keep contents cleaner longer
- Covers are puncture resistant, easy to position, and come in a wide range of sizes
- Available in flat pack or rolls for easy dispensing
- Typical areas of use: Central Processing and anywhere medical instruments/equipment are used

# Bedside Product Liners

As a leading manufacturer of bedpans, wash basins and other patient bedside essentials, Medegen introduces **BEDSIDE PRODUCT LINERS**.

The liners are designed to be a **time-saving & hygienic tool** for nurses and caregivers. It takes time to rinse and sanitize bedpans, commode buckets, wash basins, emesis basins and other items once they've been used. Medegen bedside product liners simply install into the bedside product and once used, are easily removed, tied shut and discarded. And the bedside product isn't soiled! Bedside product liners offer **peace-of-mind performance**, giving caregivers more time to spend with patients and not cleaning devices. Typical areas of use: Central Processing and anywhere medical instruments and sterile products are packaged/reprocessed.

## Bedpan & Commode Liner - LLDPE Film, Flat Seal, Drawtape Closure, Absorbent Pad Insert, Roll Pack

# Liners

Medegen liners and bags are manufactured to meet specified performance standards in accordance with Federal and specific state guidelines. Medegen produces a broad range of liners and bags to meet your specific applications needs:

- LLDPE and HDPE Can Liners
- Biohazard** Red Waste Bags
- Biohazard** Autoclave Bags
- Hamper Stands
- Kick Bucket Liners
- Laundry & Linen Bags
- Water Soluble Linen Bags

- Premium LLDPE, HDPE, PP and PVA resins to ensure consistent, superior strength performance
- Latex free and environmentally safe for incineration disposal
- Bags stocked in multiple colors to facilitate waste stream and laundry segregation.
- **Biohazard** Bags are available that comply with Federal interstate and specific state requirements for 165 gram dart impact resistance (ASTM D1709) and 480 grams tear strength (ASTM D1922) and US DOT CFR 49 173-197.

# Biohazardous Waste Bags

Biohazardous Waste Collection Bags are used to collect, store, and transport biohazardous / infectious waste within the health care facility, outpatient surgery center, alternate care clinic, physician's office and lab.

- Offered in both Linear Low Density (LLDPE) and High Density (HMW HDPE) resins. Bags < 2 mil are star-sealed while those 2 mil and greater are flat sealed. Compact coreless perforated or interleaved rolls provide compact storage and ease of use.
- Bags can be CUSTOM printed with facility or specific department name. Minimum order quantity required.
- Biohazardous / Infectious Waste labeling in both English and Spanish for easy identification of hazardous waste to reduce the risk of contamination during collection and transport.
- Meets 165 gram of ASTM D1709 Dart Impact Resistance.
- Dual-tested bags\* meet the required 165 gram ASTM D1709 Dart Impact Resistance and the 480 gram ASTM D1922 Elmendorf Tear Strength properties. Dual tested bags are required for use in Florida, Pennsylvania, and California and for Federal, US DOT interstate transport.
- Accessory hampers and wall-mounted dispensers may be used with biohazard bags for convenient placement throughout the facility.

# Autoclavable Biohazardous Waste Bags

Autoclavable Biohazardous Waste Bags are built to withstand the rigors of Steam Sterilization while meeting the requirements for the collection, storage, transport, and processing of biohazardous waste within the acute care facility. Autoclavable bags made from high strength Polypropylene (PP) Film have an operating temperature of 274°F (134°C) and can tolerate temperatures of up to 285°F (140°C). **Dual-Tested Autoclave Bags** are **ASTM D1922** Elmendorf tear tested to exceed 480g of tear strength (MD, TD) and **ASTM D1709** tested to exceed 165g of dart impact. Standard autoclave bags are tested to exceed 165g of dart impact. Bags contain an integral steam processing indicator that turns brown when autoclaved.

- Extreme temperature resistance and the BEST available tear and dart impact strength make the Dual-Tested Autoclave Bags your “peace of mind” choice. Complies with US DOT 49CFR Sections 173 – 197 and regulations in all 50 states including those with dual-test bag requirements.
- Standard autoclave bags are tested to exceed 165g of dart impact for compliance in the majority of US states (without dual-test bag requirements).
- Biohazardous or Infectious labeling in both English and Spanish or French
- International Biohazard Symbol in easy to see contrasting color
- Available in several color-coded styles for easy identification by department
- Twist ties included for easy secure closure

## Dual Tested Autoclavable Biohazardous Waste Bags with Indicator, Meet A.S.T.M. Dart Impact/Elmendorf Tear & DOT CFR 49 173-197 Requirements - Flat Seal, Coreless Roll, Twist Ties

# Laundry and Linen Bags

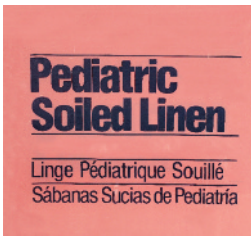

A full line of printed and unprinted, color-coded Laundry and Linen Collection Bags provides a safe and efficient method of handling soiled or infectious linen and laundry from point of collection, through storage and transport, and into final processing.

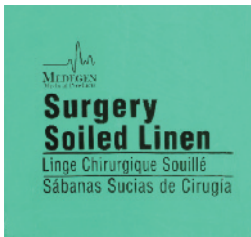

- Wide range of standard sizes and film thickness, with and without print, provides maximum flexibility to meet your facility's needs. Custom specifications and printing available. *Minimum order quantity required*
- Offered in both High Density and Linear Low Density resins for your specific application, bags are color-coded for easy identification by department
- Reinforced seams add durability and superior leak resistance
- Heavy Duty Linear Low Density Bags provide exceptional odor containment and are designed with superior tear and impact resistance for use in Multi-Story Laundry Chutes
- Typical areas of use: Housekeeping, Laundry, and most any treatment area or room where collection and transport of linens/clothing is required

# Water Soluble Laundry Bags

Water Soluble Laundry Bags are designed for the safe and effective collection and handling of potentially contaminated or infectious linen and clothing. The bag is impervious to bacteria and viruses and is gas impermeable, exhibiting excellent odor containment properties. Contaminated linen is placed into the bag, sealed and placed directly into the washing machine, eliminating the need for staff to come in direct contact with the contents.

- Allows for easy isolation of contaminated and soiled linens to help reduce risk of cross-contamination
- 100% Biodegradable polyvinyl alcohol film dissolves completely into a non-toxic aqueous solution at 150°F during Hot Water machine washing and at energy saving 55°F for the Cold Water formulation
- Superior wet strength holdout capacity
- Integral tie strap for securing bag dissolves quickly to release contents during washing cycle
- Bags supplied on easy to dispense coreless rolls and individually packaged zip closure bags
- Sizes designed to fit most standard linen hampers
- Typical areas of use: in most any treatment area or room where potentially infectious linens or clothing come in contact with bodily fluids

# Hampers and Accessories

Hamper Stands facilitate convenient placement throughout the facility and ease of use. Stands are engineered for long-lasting performance in demanding health care environments with injection molded lid made from high impact ABS crack resistant resin to withstand repeated opening and closing.

- Hands free foot pedal actuation opens lid wide for easy access & closes automatically to help contain odors
- Solid 7/8" Chrome plated steel tubing with lower support platform for heavyweight applications
- Upper locking ring holds bags of at least 30 inches wide securely in place
- Open front design provides convenient access and bag removal
- Four 3" free turning casters—two with locking foot brakes—provide easy maneuverability
- Hamper pouch provides convenient storage for additional bags
- 19" wide x 20" deep x 37.5" tall. Available with or without labels

Simple easy to use open top bags. **No Closure** provides the flexibility to heat seal or use another closure style.

XOPE40912

# Institutional Trash Can Liners

Institutional Trash Can Liners provide a leak resistant containment solution for non-medical waste disposal and are used throughout the health care facility to collect and contain refuse. Available in both Linear Low Density and High Density/HMW Polyethylene film, and in flat pack or coreless rolls for easy dispensing and convenience to provide a cost-effective solution for every application.

- Available in a wide variety of standard sizes, film gauges, flat, star seal or gusseted bottom designed to meet your specific application. *Custom specifications available — minimum order quantity required*
- Superior performance liners made from premium resins with reinforced seams are puncture resistant and impervious to liquids
- Clear liners allow quick and easy visualization of contents before disposal while colored options hide unsightly refuse
- Offered in both High Density/HMW and Linear Low Density resins for your specific application and budget
- Linear Low Density liners provide maximum strength and puncture/tear resistance due to their superior elasticity, provide excellent odor containment properties and are best suited for handling a wide variety of refuse including those with straight corners/sharper edges
- High Density/HMW liners offer excellent durability and weight capacity in a lighter gauge film that is most cost effective for refuse without sharp or jagged edges
- Latex free and environmentally safe for incineration disposal
- Easy dispensing in convenient flat pack or coreless rolls
- Typical areas of use: throughout health care facility for refuse collection. Not for use with Biohazardous Waste

# Sharps Containers

## Sharps-Tainer™

Our complete line of Stackable and Non-Stackable Sharps Containers is offered in a variety of sizes and configurations designed to give you the ability to choose the right product for your specific application. Regulated as Class II Medical devices and manufactured in accordance with FDA Quality System Regulations, as well as the International Quality System Standards ISO 13485:2003; all Medegen Medical Products Sharps Containers meet or exceed OSHA and Joint Commission Standards, CDC/NIOSH guidelines, ASTM requirements and DOT Regulations including 49CFR173.24, 49CFR173.24a, and 49CFR173.134.

- Puncture and Leak Resistant – Strong polypropylene construction meets or exceeds industry standards
- Locking Lids – Help keep contents secure for final disposal
- Autoclave/Incinerator Safe – Containers are Autoclave Safe up to a maximum of 280°F (137°C). When properly incinerated, containers emit only carbon dioxide and water
- Optional Wall Mounting Brackets and large container cart with locking casters
- Typical areas of use: Operating Room, Emergency Room, Same Day Surgery, Primary Care Treatment areas, Patient Room, Phlebotomy Labs, Chemistry & Hematology, Pathology, Toxicology, Microbiology, Immunization, Drug Screening, or wherever Biohazardous Sharps exist

# Stackable Sharps Containers

- Stackable design provides a convenient stable platform during use, economical storage, and lower shipping cost
- Wide horizontal drop lid models accommodate larger syringes and allow full utilization of fill line capacity
- Tortuous Path Lids help limit hand exposure for added security
- Transparent lids facilitate quick visual identification of fill level
- Translucent containers facilitate easy side viewing of content level
- Compact containers are conveniently sized for easy transport
- Extra large containers feature a wide hinged lid and round funneled vertical drop to accommodate endoscopic accessories, elongated disposable instruments and probes
- 5.4qt sharps fit into most 5 and 5.4qt sharps cabinets

Medegen Non-Stackable Sharps Family

# Solidifiers

**MEDEGEN MEDICAL PRODUCTS** offers non-biodegradable solidifiers for various situations involving blood or other potentially infectious fluids. These solidifiers are formulated with a wetting agent which are ideal for encapsulating blood, infectious fluids found in suction canisters, kick buckets, and biohazardous bags.

- Solidifies liquids into an easy to handle gel
- Isolates, contains and prevent the spread of biohazardous fluids
- Minimizes splashing, spraying and splattering of blood or other potentially infectious fluids
- Eliminates the problem of disposing free liquids in landfills

# Spill Control Solutions

Emergency Response Kits comply with OSHA, CDC and State Health Department. Our Emergency Response Kits are a combination of Red-Z solidifiers and personal protection items for a safe, cost-effective clean-up of blood or body fluid spills. Encapsulating and containing a potentially infectious spill, helps reduce employee exposure and cross contamination to co-workers, patients, and their families. Find the kit that's right for you.

9902	Ear Loop Surgical Mask – Yellow – Level 3	500	50
9903	Tie-on Procedure Mask – Blue – Level 1	500	50
9905	Ear Loop Procedure Mask – Blue – Level 1	500	50
99906	Fluid Shield Mask – Blue – Level 1	100	25

## Acti-Fend® Surgical Caps

Code #	Description	Qty/cs	Packaging
99907	24" Bouffant Cap – Blue	500	100
99909	24" Bouffant Cap – Blue	500	100
MOBCAP10B	Light weight 21" 10gsm Bouffant Cap – Blue	1000	100
MOBCAP14B	Standard weight 21" 14gsm Bouffant Cap – Blue	1000	100
99909	Surgeon Cap – Blue	500	100
99922	Surgeon Hood - Blue	500	100

## Vision-Tek™ Protective Eyewear

Code #	Description	Qty/cs	Packaging
*206-	Heavy Duty Safety Goggles, Clear	12	1
*208-	Safety Glasses, Clear	10	1
*209-	Safety Spectacles, Clear	36	1
*210	Description Safety Glasses Clear w/adjustable arms	12	1
211	Description Safety eye shield, Clear/Blue	500	Bulk packaging

\*Meets the requirements of ANSI Z87.1
