

# IMS

INTEGRATED MEDICAL SYSTEMS

## Oncology Program

# Your Fight Is Our Fight.

IMS is more than just a leading nationwide distributor; we are a committed partner and dedicated resource, offering solutions tailored to your unique needs.

Our specialized Oncology Program serves as your strategic ally in advancing oncology care. With a focus on innovation and excellence, we empower healthcare providers with exceptional solutions, all while prioritizing improved patient outcomes.

Our extensive catalog includes curated equipment and disposables for infusion and cleanroom needs. Additionally, through our exclusive partnership with Epic Medical, we bring cutting-edge technology, including the RxBot automatic and RxFill semi-automatic compounding systems.

## Dedicated Oncology Specialists

Trust our seasoned team for enhanced capabilities and streamlined, processes, supported by state-of-the-art Oncology technology, equipment and essential supplies.

## Strategic Revenue Partnership

Allow us to enhance your financial performance by collaborating with you to identify key opportunities. We'll educate and empower your clinic on strategic billing for ambulatory pump-related codes to ensure optimal reimbursement.

## Cost-Effective Solutions

Innovate without compromise by managing expenses effectively while delivering exceptional care with our advanced oncology equipment and comprehensive supplies.

## 24/7 Support

Enjoy uninterrupted support - ensuring operational continuity for your team, backed by our round-the-clock assistance for equipment.

# Pharmacy Compounding Systems

## Rxbot Automated Compounding System

Designed for end-to-end automation of hazardous and non-hazardous drug preparation, RxBot enables operators to do more, safely. Featuring walkaway functionality, RxBot ensures smart compounding with minimum human input.

- ISO Class 5 environment
- Uses NIOSH-compliant Closed System Transfer Devices (CSTDs)
- Complies with USP 797 & USP 800 for Sterile Chemo Compounding practices

## Semi-Automated Compounding System

This advanced desktop compounding system features a user-controlled automated process that guides the entire compounding procedure, including reconstitution, to ensure consistent accuracy every time.

- Reduces exposure to hazardous drugs
- Minimizes repetitive stress injury
- Maintains drug sterility
- Advanced features enable high-volume IV medication preparation of existing batch-filling processes

# Infusion Pumps

For more information on available equipment options or iQuest™, our asset management software, see p. 8-9

IMS offers a variety of infusion pumps to cater to the diverse needs of patient and healthcare facilities.

The range of choices allows for customization and selection of the most suitable pump for specific medical applications.

# IMS Exclusives

Cultivated to help offset the continuation of rising costs, the broad range of IMed Products™ medical disposables combines innovation and value, ensuring healthcare providers have reliable, high-quality solutions to meet their needs seamlessly.

Infusion is central to IMed disposables, driving development of high-quality disposable products. From elastomeric pumps, kits, dressings and more, IMed has you covered.

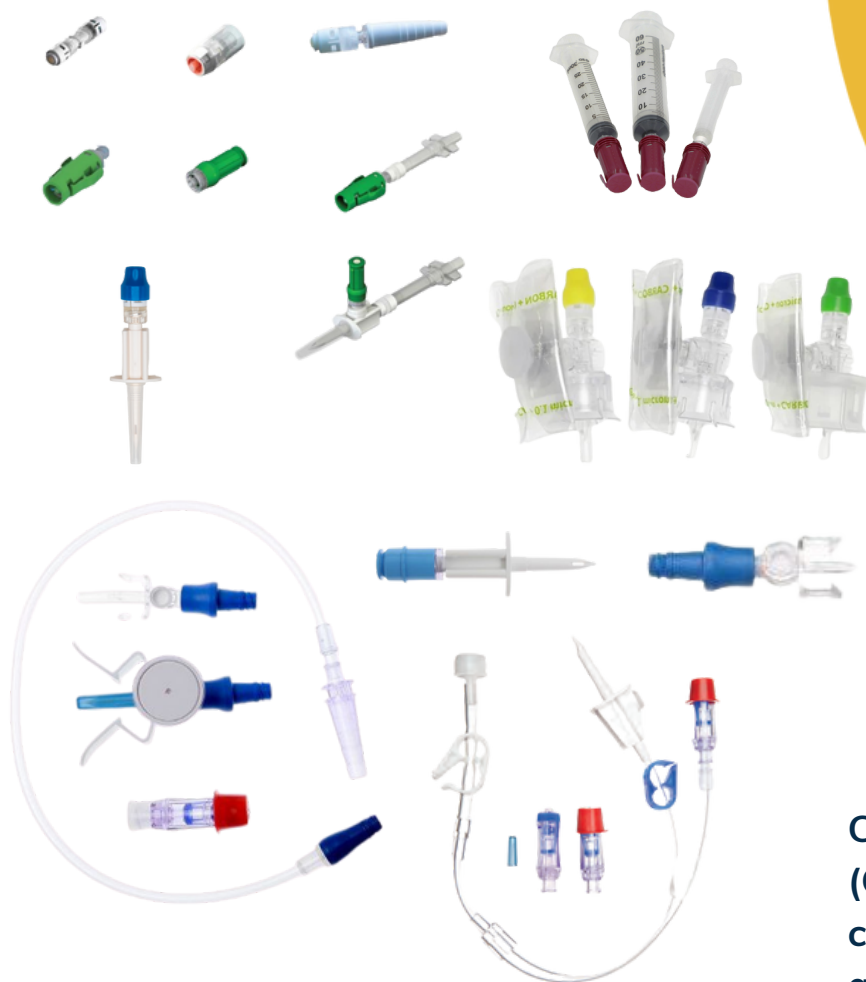

**EZ FLOW™**  
ELASTOMERIC PUMP

**EZ-FLOW™ Elastomeric Pumps are a convenient alternative to electronic infusion pumps. EZ-FLOW offers a safe and effective way to deliver medications while allowing patients freedom in their day-to-day lives without the worry of programming and battery power.**

**Priming caps on long duration and chemotherapy pumps eliminate the use of the pinch clamp and removal of patient end cap when priming.**

# Closed System Transfer Devices

Closed System Transfer Devices (CSTDs) help prevent the spread of contaminants into the environment and protect healthcare workers from exposure to hazardous drugs.

CSTDs create a physical barrier between the clinician and the drug, use air-cleaning technology to prevent hazardous drugs from escaping into the air, and equalize pressure between the drug container and the syringe.

“If we were to use a CSTD on every single use vial in our system, the drug cost savings to our system is estimated to exceed \$2.5M annually.”

# Protect What Matters Most

Managing medical equipment can be complex, unpredictable, and costly. IMS Biomedical Solutions delivers comprehensive service and support to ensure your devices remain patient-ready.

## Biomedical Solutions

- Cost-effective alternative to OEM service
- Local technicians for responsive support
- Flexible, tailored service plans

## Equipment Rental & Sales

- Infusion Pumps
- Patient Monitoring Devices
- Cleanroom Equipment
- And More

## Nationwide Coverage & Expertise

- Factory Certified Technicians
- ISO 13485 Compliant
- 11 Biomedical Service Centers

## Comprehensive Services

- Preventative Maintenance & Repairs
- Reporting & Compliance Support
- Tailored Service Plans
- Asset Management Software, iQuest™

# iQuest™ Asset Management Software

iQuest™ (iQ) is an asset management web-based software developed by IMS to revolutionize how healthcare providers manage critical medical equipment. Designed specifically for infusion and cleanroom assets, iQuest delivers a seamless, efficient, and user-friendly solution for tracking, maintaining, and optimizing your assets.

## Real-Time Analytics

Gain complete visibility into equipment costs and utilization across all facilities, enabling smarter decisions to maximize your medical asset investments.

## Communication Tools

Streamline communications with built-in maintenance notifications, patient/staff SMS alerts, and activity tracking - with every interaction automatically documented.

## Asset Management Freedom

Manage assets across multiple locations with integrated billing. Access your inventory 24/7, providing flexibility crucial for modern healthcare operations.

# IMS Oncology Program

Join the IMS Oncology Program for personalized, attentive service. Our program is designed to cater specifically to the needs of healthcare providers and their patients.

With a focus on exceptional customer service, we understand the importance of individualized solutions and collaborative support for oncology practices, hospitals, and community pharmacies.

Contact us to learn more about joining our program:  
<https://www.integratedmedsys.com/contact-us>

## Maximize Reimbursement Potential

Joining our program can help you maximize your reimbursement potential. We provide support and guidance to navigate the complex billing and coding requirements to help improve financial outcomes. This allows for increased accessibility to necessary equipment for patients who require ambulatory pump therapy.

## Priority On-Site Service & Repair

Priority on-site service and repair for biomedical equipment to qualifying facilities. With prioritized support, this ensures that essential medical equipment runs smoothly and minimizes downtime.

## Cost Savings Audit

By analyzing your current processes, purchasing, and utilization, we can uncover opportunities for cost savings without compromising patient care and provide actionable recommendations to optimize your financial performance.
